

All Metal Variable Area Flow Meter

BGN

Technical Data Sheet

- Extremely robust through star guiding system instead of guiding rod
- Flow metering of liquids, gases and steam
- Available up to nominal size of DN 150 / 6"
- Linear characteristics through conical optimized float form
- Outstanding clear meter reading through 90° arranged scale
- Electrical transmitter with HART®, PROFIBUS-PA® or Fieldbus Foundation®
- Suitable for the installation in safety related applications acc. to SIL

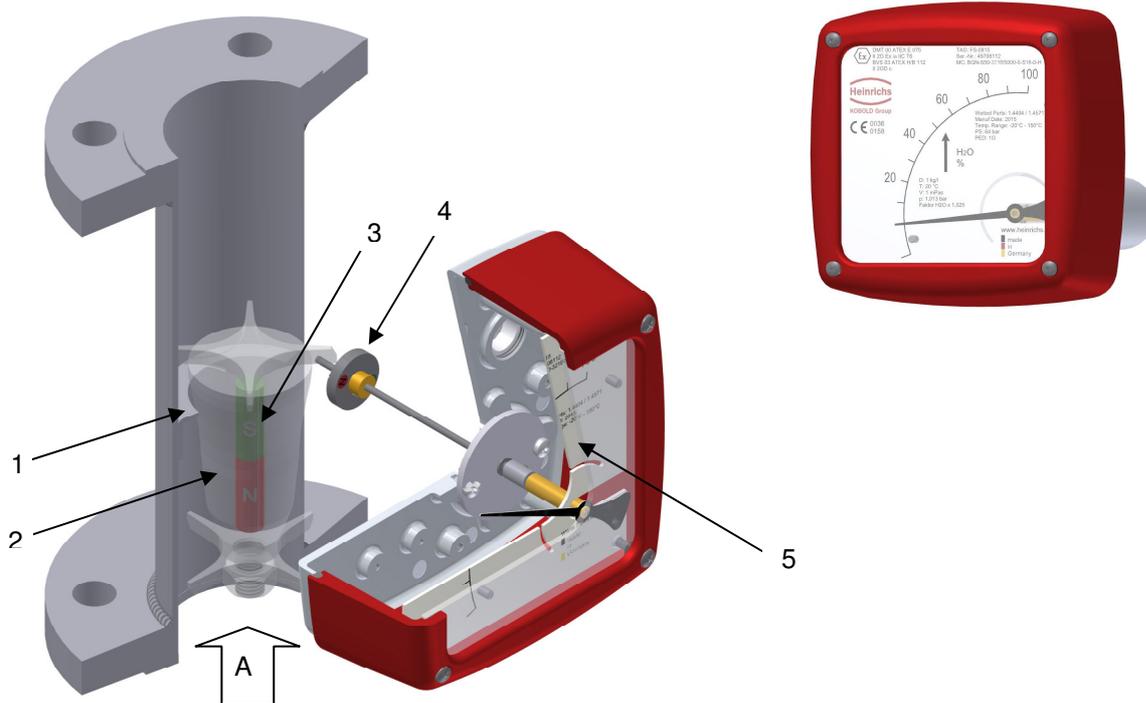

Function

The BGN variable area flow meter consists of a meter tube with connections, a measuring ring, and a conical float. The position of the float is transferred via an encapsulated magnet(3) to a counter magnet(4) which is fitted at the pointer axle and thus indicated via a pointer to the scale(5)

The fluid flows from bottom to top through the meter tube of the flow meter. The float(2) is lifted until an annular gap between the measuring ring(1) and the conical-shaped float(2) is produced which corresponds to the flow.

The forces acting on the float (weight force, flow force), are in equilibrium.

Each position of the float corresponds to a flow value measured during calibration, which is transferred to a scale.

Application

The measuring instrument BGN is suitable for flow measurement of liquid, gaseous and steam fluids in pipes. It shows the current flow rate in volume or mass per unit in time.

Applications: flow measurement, dosing, monitoring, adjusting and control of liquid and gaseous products.

The meter design makes it ideal for processes under difficult and rough operating conditions.

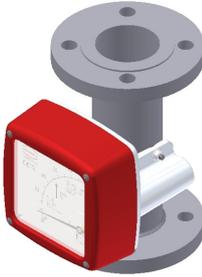

The devices are available with additional electrical equipment for process monitoring and control.

- A large variety of wetted materials
- Very safe magneto-resistive signal transmission
- Gas or liquid damping (option)
- Applicable for high pressure applications and high temperature processes
- Excellent heat tracing technology (option)
- Double eddy current damping (option)
- Self draining (option)
- Backflow stop (option)
- Differential pressure flow regulator (option)

Versions / Instrument Models

Aluminum Indicator

Optimized aluminum indicator.
Large and well arranged scale with 90° angle for optimal reading.
Rounded edges and rims ensure a smooth draining of liquids after wet contact. A special anodization and paint finish makes the indicator housing also suitable for outdoor use.

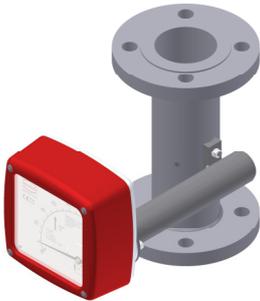

Process connections: Flange, thread, clamp, weld ends

Stainless steel indicator

Stainless steel indicator
with IP 67 protection for extreme applications.
Large and well arranged scale with 90° angle for optimal reading.
Round design ensures a smooth draining of liquids after wet contact. Salty and rough environments e.g. off-shore applications do not show any problem.

High temperature version for up to 350 °C with displaced indicator

Displaced indicator for process temperatures up to 350 °C.
For very high or very low process temperatures the indicator will be displaced from the measuring pipe.
The use of limit switches or transmitters are without limitations.

Instrument lining / Special materials

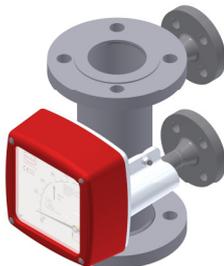

PTFE lining for highest chemical resistance..
Wetted parts made of Hastelloy or Monel.
Through the unique design of the measuring pipe with cylindrical pipe and conical float the meters can be made from various special materials. This allows the use in special areas and / or highly corrosive process applications e.g. for acid and lye

High Pressure Applications

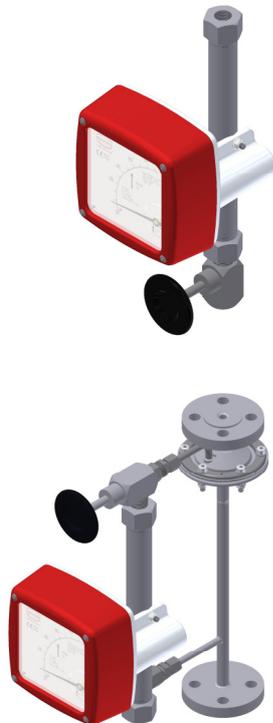

Through the unique structure of the measuring fitting with cylindrical measuring pipe and concial float, the units can be produced with thick walled pipes. This enables the use in high pressure applications for which other measuring instruments are not available e.g. sour gas, tunnel drill machine lubrication

Instruments with heating jacket

The cylindrical measuring pipe allows a double wall design with heating jacket for e.g. steam, hot water or thermal oil. This enables the meter being used for extremely difficult fluids or applications. The heating jacket connections will be produced acc. customer demand.

Component Assembly / Special solutions

In close cooperation with our customers we develop solutions for their measuring tasks and problems. We plan and manufacture application based assemblies acc. customer demands - e.g. with regulatinjg valves, flow controllers, differential pressure flow regulator including piping etc.

Technical Data:

Fitting

Wetted parts:	st.st. 1.4404 (316 L) / 1.4571 (316 TI), Hastelloy C-22/C4, PTFE, Monel, Titanium and other materials on request
Process connection:	Flanges acc. EN 1092-1, ASME B16.5, JIS, NP or G pipe threads, TriClamp Special connections acc. customer demand.
Nominal pressure:	BGN-S/H: PN 40, ASME CI150 / 300 (Standard) BGN-P: PN 16, ASME CI150 (Standard) higher pressure ratings on request (max. 600 bar)
Process temperature:	BGN-S/H -40°C +350°C BGN-P -40°C +125°C
Umgebungstemperatur:	-40°C ... +80°C (without electrical equipment) -40°C ... +65°C (with electrical equipment)
Protection:	IP 65 / IP 67 (EN60529)

Indicator

Aluminum IP 65
st.st. IP 67

Limit switches

max. 2 pcs inductive limit switches
max. 2 pcs inductive limit switches in safety technology
max. 2 pcs SPDT micro switches

Electrical transmitter:

ES c/w HART-protocol
ES c/w HART-protocol and 2 NAMUR-contact
ES c/w HART-protocol and 1 NAMUR-contact / 1 pulse output
ES c/w Profibus-PA®
ES c/w HART-Protocol und totalizer module
ES c/w Foundation FIELDBUS®

Power supply:	14 - 30 VDC (reverse polarity protected)
Output signals:	passive, galvanically isolated
Analog output:	4-20 mA
Binary output 1 and 2:	$U_i=30\text{ V}$, $I_i=20\text{ mA}$, $P_i=100\text{ mW}$
Binary input:	totalizer reset (only for ES c/w totalizer module)
Ambient temperature:	-40°C +70°C
Protection:	IP 20 (EN60529)

Measuring Accuracy

(BGN-S/H)	± 1,6% of actual qG 50% acc.. VDI/VDE 3513-2
(BGN-P)	± 2% of actual qG 50% acc.. VDI/VDE 3513-2
	± 0,2% additional error for transmitter ES

Repeatability	± 0,5 %

Reference conditions: acc. IEC 770
Water 20 °C; air 1,013 bar abs.

- for BGN-P version (PTFE), float with tantalum collar, measuring cone made of borosilicate glass
measuring range: A 0.7–7.0 l/h, B 1.2–12 l/h, C 2.0–20 l/h
- gas throttle in S version for gas measurement included in price (pressure loss 200 mbar)
- not available in P version
- sizing for higher viscosities not possible
- only in S and H version, only with reduced sealing face
- gas measurement not possible
- with only atmospheric pressure a measurement is not possible. Indicated values are for orientation. For gas measurements a factor of 2-3 of the inlet pressure should be considered as minimum operating pressure
- Restrictions for units with PTFE lining

(H5)	345B	DN150 PN16 Form B1 DIN EN 1092-1	346D	DN150 PN40 Form D DIN EN 1092-1
	345D	DN150 PN16 Form D DIN EN 1092-1	212R	6" Class 150 RF ASME B16.5-2003
	346B	DN150 PN40 Form B1 DIN EN 1092-1	232R	6" Class 300 RF ASME B16.5-2003
	Measuring ranges (Water 20°C, 1 mPas)			
	A	Model S: 0,5 - 5 l/h	Model P: 0,7 - 7 l/h	
	B	Model S: 1 - 10 l/h	Model P: 1,2 - 12 l/h	
	C	Model S: 1,6 - 16 l/h	Model P: 2 - 20 l/h	
	D	2,5 - 25 l/h		
	E	4 - 40 l/h		
	F	5 - 50 l/h		
	G	7 - 70 l/h		
	H	10 - 100 l/h		
	I	16 - 160 l/h		
	J	25 - 250 l/h		
	K	40 - 400 l/h		
	L	60 - 600 l/h		
	M	100 - 1000 l/h		
	N	160 - 1600 l/h		
	P	250 - 2500 l/h		
	Q	400 - 4000 l/h		
	R	600 - 6000 l/h		
	S	1000 - 10000 l/h		
	T	1600 - 16000 l/h		
	U	2500 - 25000 l/h		
	V	4000 - 40000 l/h		
	W	Model S: 6000 - 60000 l/h	Model P: 5500 - 55000 l/h	
	X	8000 - 80000 l/h		
	2	10000 - 100000 l/h		
	4	13000 - 130000 l/h		
	Heating / cooling			
	0	without heating / Cooling		
	1	Heating / cooling, connection EO12 mm	(stainless steel)	
	2	Heating / cooling, connection DN15, PN 40	(stainless steel)	
	3	Heating / cooling, connection ½" Class 150 ANSI	(stainless steel)	
	4	Heating / cooling, connection ½" NPT (F)	(stainless steel)	
	Damping / spring stop			
	0	without		
	F	with liquid damping		
	G	with Gas damping		
	A	with Spring stop		
	S	with Gas damping and spring stop		
	Self draining			
	0	without		
	L	with self draining body		
	-	Certificates		
	0	without		
	1	Certificate of compliance with the order 2.1		
	2	Test report 2.2		
	B	Inspection certificate 3.1 with material certificate (DIN EN 10204:2004)		
	C	Inspection certificate 3.2 with material certificate (DIN EN 10204:2004)		
	N	Material certificate NACE		
	-	Display		
	S	Standard display housing, Process temperature ≤ 150°C for electrical output,		

	Process temperature ≤ 200°C for local indication
V	Standard display housing forward advanced, process temperature ≤ 350°C
E	Stainless steel display housing IP67, working temperature ≤ 150°C
H	Stainless steel display housing IP67 forward advanced, process temperature ≤ 350°C
T	Standard display housing with pressure compensation, Process temperature ≤ 150°C for electrical output, Process temperature ≤ 200°C for local indication
W	Standard display housing with pressure compensation forward advanced, process temperature ≤ 350°C
Scale	
1	%-Scale (Water)
2	Measuring range-Scale (Water)
F	Double-scale (acc. customer preference)
4	%-Scale (Media)
5	Measuring range-Scale (Media)
Switches / electrical output	
0	without
1	1 x inductive switch, Type SJ 3,5 N
2	2 x inductive switch, Type SJ 3,5 N
3	1 x inductive switch, Type SJ 3,5 SN (safety design)
4	2 x inductive switch, Type SJ 3,5 SN (safety design)
6	Transmitter ES with HART-protocol, 4-20 mA, EEx ia
7	Transmitter ES with HART-protocol, 4-20 mA, EEx ia / 2x NAMUR-switch
8	Transmitter ES with HART-protocol, 4-20 mA, EEx ia / 1x NAMUR-switch, 1x pulse output
9	Transmitter ES with Profibus PA, EEx ia
C	1 x microswitch
D	2 x microswitch
E	1 x inductive switch, Type SB 3,5-E2, three wire
F	2 x inductive switch, Type SB 3,5-E2, three wire
G	1 x induktiver Grenzkontakt NCB2-12GM40-Z0
I	Transmitter ES with HART-protocol and counter module
K	Transmitter ES with Foundation Fieldbus
